EXCLAIMER SIGNATURE MANAGER

Award-Winning Software

Design, control and manage email signatures across your entire organization with the Exclaimer Signature Manager Product Suite.

Give your users the most consistent, professional and legally compliant email signatures for Microsoft Exchange, Outlook and Office 365.

exclaimer™ signature manager exchange edition

- Add signatures to all emails passing through Exchange - including on mobile devices.
- Design the perfect template with logos, legal disclaimers, marketing banners, social media links and more.
- Get consistent signatures with auto-completed user details pulled from your Active Directory.
- Ensure everyone has the same well branded email signature companywide and be safe in the knowledge that no unauthorized user can modify it.
- Convert all plain-text email signatures into full HTML on all devices including smartphones and tablets.
- Compatible with Exchange 2013, 2010 and 2007.

exclaimer™ signature manager outlook edition

- Distribute email signatures directly to an end user's Outlook client.
- Combine static text with images and dynamic data to create compelling Outlook email signature templates.
- Allow users to control which signature they apply when composing an email message.
- Centrally control the font and format of all email signatures.
- Create rules based on users' Active Directory attributes, giving different email signatures to different teams.
- Add promotional banners and social media icons to use an email signature as an additional marketing channel.
- Compatible with Outlook 2013, 2010, 2007 and 2003 and Outlook Web Access (OWA).

exclaimer™ signature manager office 365 edition

- Centrally manage email signatures for all staff using Office 365.
- No requirement for an Exchange server and all user details are taken from an Office 365 Directory or an on-premise Active Directory.
- Update all Office 365 email signatures from one central console, providing ultimate control.
- Design multiple signatures with dynamic content such as promotional banners, social media links, marketing artwork, compliant legal disclaimers and more.
- Create multiple email signatures so users can select the most appropriate one for their messages from the Outlook drop-down menu.
- Compatible with Office 365.

> I recommend Exclaimer Signature Software to everyone. This is what Exchange is missing – sometimes the seemingly simple things prove to be truly impressive.

Ratish Nair
Microsoft Exchange MVP

> Exclaimer creates the best signature management software on the market. It's well designed, well written, well supported and extremely stable.

Robert Pearman
Microsoft MVP, Windows

> Exclaimer products should be a standard option for everyone with Exchange. I would recommend them based on the support alone.

Milind Naphade
Publisher, MSExchangegeek.com

Exclaimer Signature Manager

PROFESSIONALLY BRANDED EMAIL

Design Your Template

Use our powerful editor to create the exact signatures you want or choose a template from the comprehensive library, then distribute the signature to all users.

Promote Marketing Campaigns

Use date-based rules to add a banner for an upcoming promotion or event, then automatically remove/update it where needed.

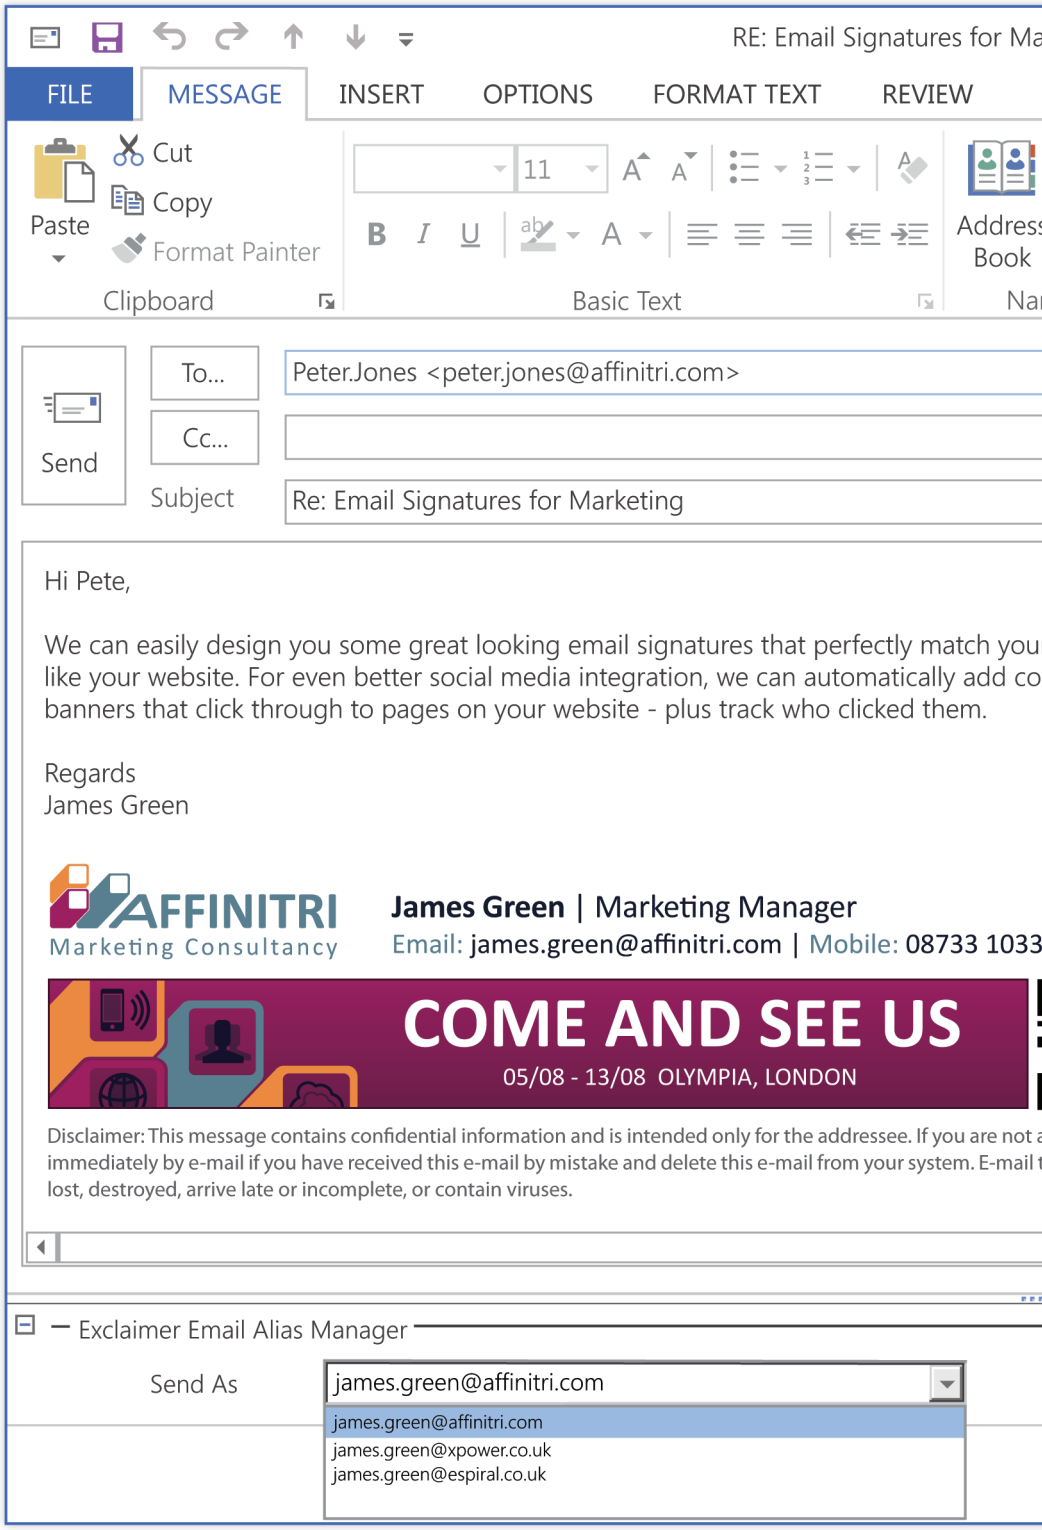
Add Social Media Elements

Let users 'Follow' or 'Share' your social media profile through clickable buttons in your email.

Use our 'social media strip' feature to drop in a pre-made and customizable strip of interactive social media buttons, such as a Twitter 'Follow' or a Facebook 'Share' link. Also, display your latest social media update like a Tweet or blog post.

Policy Based

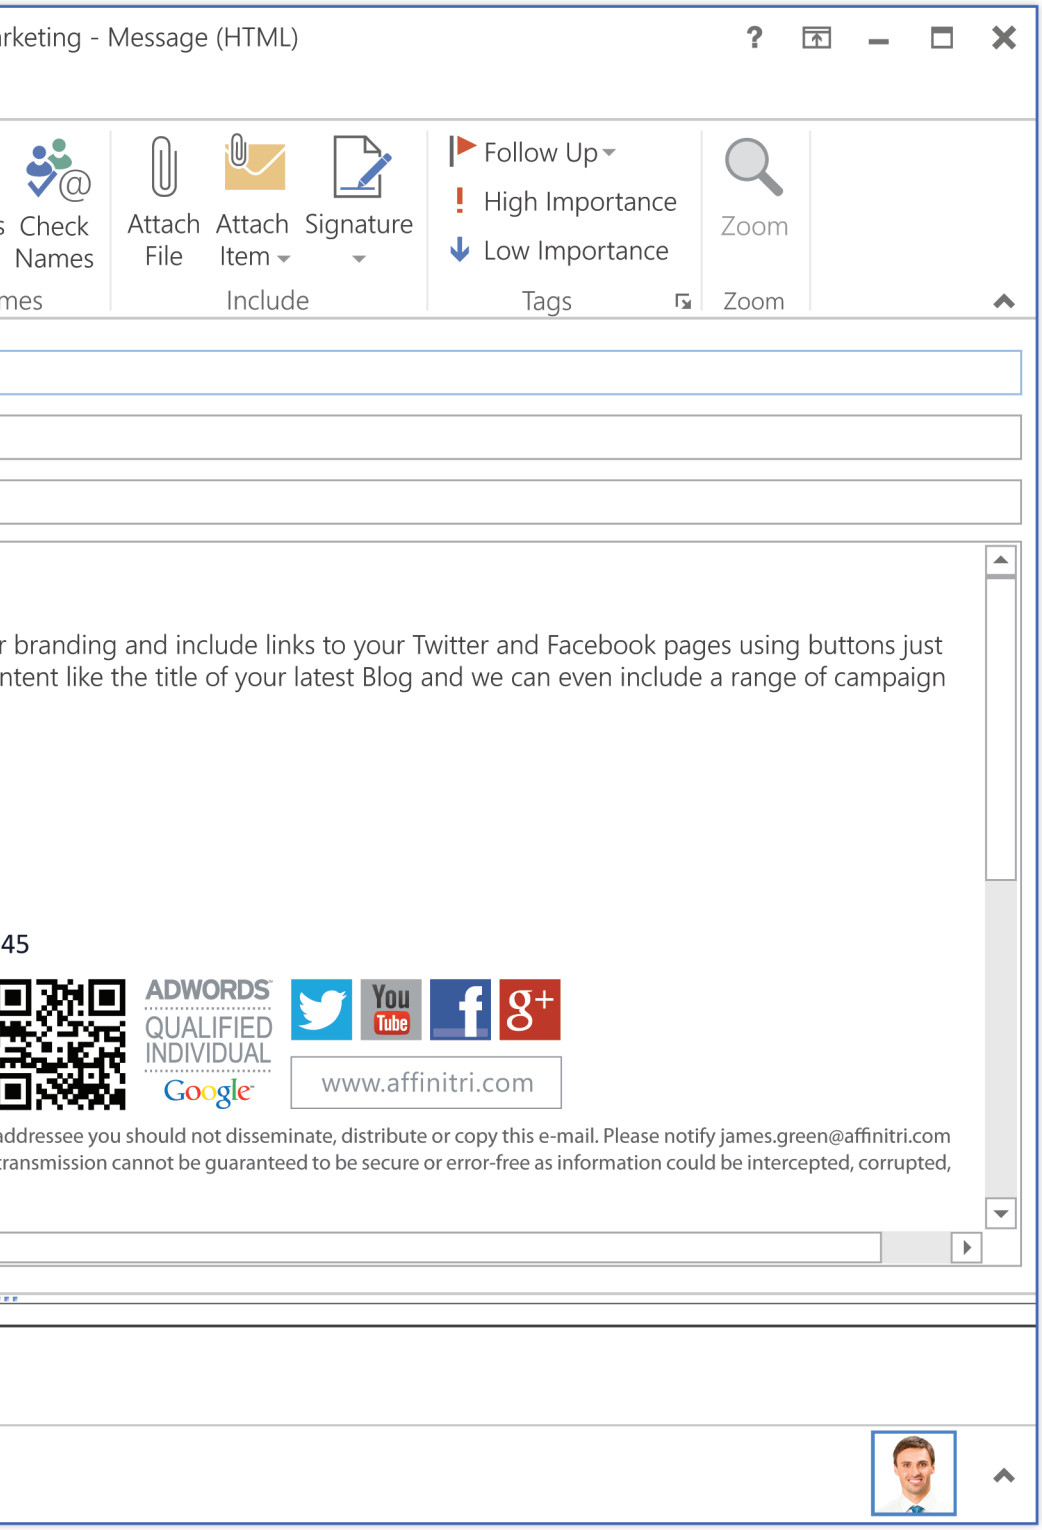
Policies combine rules and templates giving you the power to easily create a different signature for every user in your company.



Active Directory & Office 365 Directory Integration

Give different users different signatures based on their AD or Office 365 directory attributes.

Keep everyone happy by letting each team use a different template to suit their needs. Give extra branding to the marketing team's signature but a promotional banner to the sales team.



On Any Device

Get high-quality signatures on all emails, even if they are sent from mobile devices like a smartphone or tablet PC.

Test Your Creations

Check your signatures work before you deploy. Our policy tester provides a graphical overview of who gets what signatures and why.

Central Control

Ensure that all users get the correct signature wherever they are located via one console within the software.

Showcase Your Excellence

Promote your organization's accomplishments and achievements with award logos and certification icons.

Complete Compliance

Be sure every email gets the appropriate legal disclaimer that users can't remove or alter.

Add QR Codes

Scannable barcode links for mobile devices (QR codes) can be automatically generated for each user using our in-built QR code generator.

exclaimer™
template editor

Give marketing control over email signature designs

With Exclaimer Template Editor, our all-purpose signature editor, your marketing department can create, edit and manage email signature designs without having to access the Exchange server, giving them creative control.
